STAINLESS STEEL

**AK671**  
METALLIC SMOKE

**AK672**  
PALE BRASS

**AK674**  
METALLIC PURPLE

# 1 READY TO USE

Very easy to use with high opacity, and ultra realistic finish. Not necessary to apply primer as this paint will NOT AFFECT THE PLASTIC in any way as some other brands do. We recommend only a primer when you use the two special colors: Chrome and Polished aluminium that contain a special formula to obtain the mirror effect. When dry you can polish these paints with a cotton cloth to achieve an even brighter sheen. But keep in mind that adding a primer first will delay the drying time.

# 2 WEATHERING RESISTANT

The paint can handle any weathering process where other metallic paints fail, no matter if you use alcohol, enamels or acrylics based products. As example we spilled enamel based weathering products over the painted surface, and just by whipping it off you see that the paint stays intact. Ready for the next phase.

# 3 EXACT COLORS HIGH SHEEN

Xtreme metal colors are true to nature as you can see in this titanium example of the real metal and the color applied over a plastic spoon. The high quality super fine pigments have as result an ultra high sheen. When covered with a varnish the metallic effect can be enhanced and sealed.

# 4 MASKING

It's of course necessary to respect drying times before you start masking and want to avoid any problems. We recommend you respect a drying time of 2 hours when the surface isn't primed and 6 hours when a primer is applied to let the paint harden thoroughly. The drying processes of the particles need to be respected just as with any type of paints to have a smooth process in the steps taken. In the following images you can see the process of masking, painting and removing the mask or tape. Take a closer look at the final picture, the acrylic paint is removed with the tip of a knife without damaging the Xtreme metal paint, AMAZING!!

# ONCE YOU USE THE XTREME METAL PAINTS YOU WILL NEVER WANT TO CHANGE

All the metallic colors have been developed in the AK Interactive factory after intensive research to obtain outstanding results, with no equal on the market. If you want real metal...YOU GOT THEM!!!
